

Creature Features Series for Kids

Under the Water

Come explore the creatures that live in lakes and streams!

Children will use nets and scoops to take samples from the nearby water and look for bugs, snails, and other creatures and learn what makes these animals special. Dress for a mess as this is a hands-on program. Water proof boots would be helpful.

Geared towards children ages 4-10, but families of all ages are welcome. An adult must accompany all child participants.

Register using QR code or at
www.friendsofHUDSONparks.org.
Limited to 25 children.
